

NOTICE TO PASSENGERS

On February 15, 2024, the California Public Utilities Commission (CPUC), authorized Star & Crescent Boat Company doing business as Flagship Cruises & Events (“Flagship”) to increase its fares by \$1.00. The CPUC also authorized Flagship to raise and lower fares by 15% by providing the CPUC and passengers with ten days notice of any change in fares within that range. (Decision Number D.24-02-016)

As explained below, however, our fare will remain at \$8.

Flagship’s fares consist of a base fare and fuel cost surcharge. In August of 2021, the CPUC set our base fare at \$7. Ten months later, in June of 2022, the CPUC adopted a fuel cost surcharge authorizing all vessel carriers in California to increase their fares by 20% because of the sharp increase in the cost of diesel fuel. While the CPUC’s action permitted Flagship to immediately increase its fare to \$8.40, Flagship left its fare at \$7 for another year and did not increase it to \$8, to reflect the CPUC’s fuel cost surcharge until June of 2023.

Since the CPUC has now raised Flagship’s base fare to \$8, Flagship will charge only the base fare, \$8, at this time. If the fare changes in the future, notice of that change will be posted in this vessel.
